

# Ladder Planning Worksheet

Find the projected number of students for next school year for each grade and compare with last year:

## This Year:

Seniors: \_\_\_\_\_

Juniors: \_\_\_\_\_

Sophomores: \_\_\_\_\_

Freshmen: \_\_\_\_\_

Total: \_\_\_\_\_

Faculty and Staff: \_\_\_\_\_

## Last Year:

Seniors: \_\_\_\_\_

Juniors: \_\_\_\_\_

Sophomores: \_\_\_\_\_

Freshmen: \_\_\_\_\_

Total: \_\_\_\_\_

Faculty and Staff: \_\_\_\_\_

**Note:** If your population has any big changes in size, you may need to consider adding pages or removing pages from those portrait sections.

Now for each of the following count the number of pages you used for each section in last year's book:

Closing Pages: \_\_\_\_\_

Colophon: \_\_\_\_\_

Index: \_\_\_\_\_

Ads: \_\_\_\_\_

Sports Team Photos: \_\_\_\_\_

Clubs and Group Photos: \_\_\_\_\_

Senior Portrait Pages: \_\_\_\_\_

Junior Portrait Pages: \_\_\_\_\_

Sophomore Portrait Pages: \_\_\_\_\_

Freshmen Portrait Pages: \_\_\_\_\_

Faculty and Staff Portrait Pages: \_\_\_\_\_

Opening Pages: \_\_\_\_\_

## Total number of pages in your yearbook:

\_\_\_\_\_

So now you need to complete your math problem to determine how many pages you will have for your content pages in your yearbook.

$$\begin{array}{r} \text{Total \# of Pages} \\ \hline \end{array} - \begin{array}{r} \text{Total \# of} \\ \text{Reference Pages} \\ \hline \end{array} = \begin{array}{r} \text{Total \# of} \\ \text{Content Pages} \\ \hline \end{array}$$

**Total # of Content Pages:** This is the number of pages that you will now need to decide how to organize within your yearbook.

**Total number of pages for reference:** \_\_\_\_\_
